Four Undergraduate Programmes in History

Programme Objectives & Outcomes

Past is before us all. Individual, family, villages, communities, regions, nations and humanity have all sense of their past. Hence, there are many claimants of and contestation of the past. In the face of such multiple claimants of the past, such as by tradition and myth of a community regarding certain notions of past, how does one foster historical thinking? Historical Thinking involves thinking about the issues of historical significance, continuity and change, progress and decline, and evidence thereof. Historical thinking involves asking relevant questions about past, discovering new sources or reanalysing the existing sources/evidence following historical methods

The UG Programmes are organised to provide the greatest flexibility to its students, with multiple entry and exit option. There are Core papers that provide the fundamental knowledge in the discipline of history and in the study of the History of India, Odisha and the World. The programme is otherwise envisaged to provide a large amount of choices so that students can tailor their education on the basis of their interests. These provide not just skills in history but also vital skills in other disciplines. The programs are interdisciplinary keeping in mind that specialisation in History is the key to access cognate skills from other disciplines. There are Skill Enhancement Courses, Multi-Disciplinary courses, Ability Enhancement Courses, etc which would facilitate overall knowledge and skill development of candidates.

Nature and Extent of the Programme

The programmes are designed in a very flexible manner with the option of multiple entry and exits. This flexibility makes the program one year certificate, two year diploma, three year degree with two majors, three year degree with One Major and two Minors, four year program with Honours with research and four year program without research. These flexibilities in Programs have been given later in the structure. Each semester is for the duration of sixteen weeks. In this syllabus, reference to important books along with link to video resources is given. Students are advised to go the website of E Pathshala, Consortium of education Communication (CEC), SWAYAM Portals to see excellent video materials.

Programme Objectives: Four Year Courses (PO)

PO 1: The Four Year History syllabus at Higher education of Odisha aims at the discipline of History which instructs students on how to read and process information on people, societies,

cultures, events and places which are removed from our time and space. Knowledge of this past is critical in understanding the ways in which the present world is connected and responds to its history in sometimes overt and at other times more complex ways that is missed by most people.

PO 2: The program aims to develop a historical thinking that goes beyond the linear narrative of past and set it anchored to right historical thinking by developing critical analysis of the sources and their interpretation of the past.

PO 3: The Program provides information about different aspects of the past to students, to teach them how to use, analyse and interpretation of evidence, instruct them on how historians research, frame an argument and debate details which have bearing on the present.

PO 4: The program aims to develop local history by encouraging students to construct history of the locality by encouraging students to explore different dimensions of the past by collecting evidence from land officials, temples, archaeological sites, etc.

Program Outcomes (PO)

PO 1: After the completion of the four year program, students are expected to have acquired the skills of critical thinking, rational enquiry, effective communication, and exploring the relationship between past, present and historiography.

PO 2: The students will be able to know that history is a knowledge discipline and not rote memorisation of dates and events. It will enhance student's ability to carefully read a complex historical narrative by a historian in his historical writing, evaluate the use of evidence by the historians and possible selective use of evidence. In short, they are expected to construct historical narrative and formulate arguments based on a historiographical engagement

PO 3: Develop skill and knowledge of deciphering the primary sources, such as recognition of script, potteries, land records through their internship

PO 4: Develop responsible citizenry which respects gender concerns, human values and correct historical thinking and transmit them to society through community engagements

PO 5: The program enhances the Capability of students to assume leadership roles and apply the above mentioned analytical abilities in various other non-familiar contexts.

PO 6: Students will have the cognate skills such as reasoning, analysis and critical thinking

PO 7: Students will develop skill of picking up disparate sets of information from local sources and internet and weave a coherent argument with a view to reveal identifiable patterns of continuity and changes.

Graduate Attributes of History Program and Employment Opportunities

Upon successful completion with the above mentioned programme outcomes for the students, students will have attributes such as the ability to collect data from various data-mining sites, such as museum, archive, newspaper, material artefacts; analyse and process evidence and construct narrative of a particular aspect of past. Such skills will open up career opportunities in the following field

1. Museum, 2. Archives, 3. Research Institution, 4. Academic 5. Journalism 6. Development Studies 7. Archaeology 8. Archive 9. Cultural Institutions 10. International

Core IV Social Formations and Cultural Patterns of the Medieval World

Course Objectives

- The Course seeks to develop a historical understanding of the major developments in some parts of the Ancient and Medieval world.
- The Course provides a scope for understanding the subject of slavery in its varied dimensions in the Ancient world. One of the objectives of the course is to highlight the interconnectedness of Greek and Roman religion, culture and society. We discuss the medieval world in the Course by analysing the nature of European 'feudal' society and economy of the 8th to the 14th centuries.
- Explores the process of emergence of Christendom and Papacy and the 2nd Order
- The objective of paper is to the making of the three orders in Medieval Europe. By studying how the European social world shaped into an intricate structure comprising powerful institutions like monarchy and the Church.
- The Course provides a scope to understand the medieval economy of Western Europe, particularly through its agrarian dimensions and relatively newer labour systems like serfdom.
- And finally, the Course allows an undergraduate student to reflect on questions related to the emergence and spread of Islam. An enquiry into the role that it played in the transformation of a tribal identity to a Caliphal State in West Asia from the 7th to the 9th centuries widens the quest for 'training' students to understand the long-term historical processes.

Course Outcomes

- Upon completion of this course the student shall be able to: Identify the main historical developments in Ancient Greece and Rome.
- Gain an understanding of the restructuring of state and society from tribe-based polities to those based on territorial identity and citizenship.
- Trace the emergence and institutionalization of social hierarchies and marginalization of dissent.
- Explain the trends in the medieval economy.
- Analyse the rise of Islam and the move towards state formation in West Asia.
- Understand the role of religion and other cultural practices in community organisation.

Unit-I: Polity and Economy in Ancient Rome

1. Polity, Society and economy in Ancient Rome
2. Expansion and Crisis, -Rise and fall of Julius Caesar, Augustus Caesar, Political Expansion, Crisis of roman empire
3. Cultural Developments: literature: Vigil, Ovid, Seneca, Histories: Livy, Tacitus; Art and Architecture

Unit-II: Economic Developments in Europe from 7th to 14th Centuries:

1. Feudalism- Major Debates, Origin, Forms, Structure, Two Phases of Feudalism & its Decline
2. Agricultural Production in Two Phases of Feudalism
3. Towns and Trade

Unit-III: Religion and Culture in Medieval Europe:

1. Medieval Church: Expansion of Christianity, Early Bishopries, Papacy at Rome, Schism in Church- Ecumenical Councils and Great Schism between Eastern and Western Church of 1054
2. Monastic Communities: Benedictine, Dominicans, Franciscan order, Anchoress; Monasteries and Education & Health
3. Papacy: Growth of Papacy from St. Peter to Avignon Papacy

Unit-IV: Societies in Central Islamic Lands:

1. The Tribal background, Rise of Islam; Major pillars of Islam, expansion of Islam
2. Religious Developments: the Origins of Shariah, Ummah, Islamic Jurisprudence, Sufism,
3. Cultural Developments in Islamic World: Tradition of Historiography,

Unit I:

This unit makes students understand the differences between the democratic forms of polity of Greek versus the roman Republican form of Government. It makes people critically analyse how the Republican institutions emerged as a checks and balances between not only institutions such as Plebeian council and Senate but as largely emerged out of the assertions of certain social groups. It also examines the shortcomings of the republican institutions and

circumstances leading to the emergence of empire and rule of Caesars. Students are also acquainted with the slave mode of production and the crisis in it.

Unit II:

Christianity found its social support base from the poor and proletariat population of the Roman Empire. However, apart from the social base of Christianity which promised them a Kingdom of Heaven, the paper makes students understand that the spread of Christendom was also due to institution of Church. However, like other religion Christendom developed schism and split spread over many ecumenical types of council. Further it also explains how the See of Rome became *primus parus* status among other bishoprics and became the seat of Pope. The Unit also looks at the politics-religious role of Pope as well.

Unit III:

This Unit will provide a detailed understanding of European feudalism and shifts in medieval society and economy. It deals with debates on the origin of Feudalism in order to make students appreciate that there exists no divergence of opinion on the forms and structures of Feudalism. Was it a strictly legalistic, militaristic relation between lord and vassals or it is mode of production characterised by serfdom of peasants or was it characterised by Chain of Dependencies? These debates on the origin as well the forms of feudalism are dealt in this unit

Unit IV

Apart from Unit II, Unit IV also deals with another Abrahmic religion, i.e Christianity. Rather than treating it as an imminent religion, the rise and Islam has been explained in terms of historical contingencies of time. Further, the unit deals with key concepts such as contractual origin of the State of Medina, the fusion of religious & political authority in the institution of Caliphate, the notion of Umma and Sultanates in the Islamic Caliphate, and the attitude of Islamic states towards non-Muslim

Unit-IV: Economic Developments of the Sixteenth Century:

1. Shift of economic balance from the Mediterranean to the Atlantic.
2. Commercial Revolution- Causes and Nature
3. Growth of Industries and its Impact

Unit I:

The unit makes students acquaint with debates on the decline of Feudalism in order to make students aware of the different perspectives of historians on past. The geographical discovery also brings in the issue of euro-centrism in our syllabus. Long before the European discovery of the New World and India, Arab and Viking traders traded with India in South East Asia. What is novel about geographical discovery was the colonialism of the European and destruction of indigenous people and civilisation in the New World. White Colonialism and Modernity of Europe are conjoint twins of the European project.

Unit II:

Renaissance marked the discovery of man and reason. Renaissance opened up a new world which was different from medieval Europe. The unit also makes students understand the European project of modern nation state was marred by religious wars, persecution and long period of blood which partially ended with the treat of Westphalia of 1648.

Unit III: This unit deals with different avatars of capitalism. Starting with mercantile and commercial capital, Europe slowly went to industrial capital. In the process, new financial institutions such as Bank of England, Shareholding Company, ledger account, etc emerged. The unit also acquaints with mercantilism as a school of thought and how it was challenged by Adam Smith and Ricardo.

Unit IV

As a result of the Atlantic route, theatre of commercial activities shifted from the Mediterranean to Atlantic. Empires such as Portuguese and Spanish empire emerged but later it was French, Dutch and English who controlled the Atlantic route. With the colonisation of the New World, triangular slave trade emerged. Colonialism provided capital and market so crucial for the start of the Industrial Revolution

Evolution of Modern Political Thought in India

Course Objectives:

- The course intends to introduce students to major political ideas and ideologies in India. Moreover, they are to be provided with the understanding of evolution of the state, its reshaping and changing nature through a “close reading” of key thinkers and thoughts.
- Studying the evolution of political thoughts would equip students to appreciate the complex foregrounding of concepts such as equality, fraternity, and justice.
- Students would be equipped to understand the complex and layered structures of freedom struggle and thus they would be able to appreciate the process of nation-making.

Course Outcomes:

- Students would learn about the nature of political thought and ideologies and could then appreciate the fervour and diversities in Indian democracy.
- Students would learn the basics of intellectual history and how to read key historical texts with context.
- Students would learn and grasp the layered complexities of the nation-state and the kind of accommodations and adjustments any nation-state makes to manufacture citizenry and ideals.

Unit I: Encounter with the West

1. Early Nationalist Responses: Ram Mohan Roy, Bankim Chandra Chattopadhyay, Dayananda Saraswati
2. Reading Traditions with a Dissent: Jotirao Phule, Ramabai.
3. Economic Critique of Colonialism: Dadabhi Naoroji, MG Ranade, Gopalkrishna Gokhale.

Unit II: Revolutionary Action and Civilisational Thinking

1. Aurobindo Ghose and *Bhawani Mandir*,
2. Sachhindranath Sanyal and *Bandi Jeevan*
3. Revolutionaries: Ghadar Party, Hindustan Socialist Republic Association

Unit III: Nation and Nationalism

1. Rabindranath Tagore: A Life in Creative Unity, Nationalism
2. Mahatma Gandhi: Hind Swaraj, India of My Dreams

3. BR Ambedkar: Castes and Untouchability in Hindu Society, Annihilation of Caste

Unit IV: Communists and Socialists

2. Ram Manohar Lohia: Life in Indigenous Evolution, Main Currents of Lohia's Political and Social Thought, Political Thought of Lohia, Critique of Western Ideologies, New Socialism, Model of Political System for India; Social Thoughts of Lohia; Lohia as an Internationalist.

3. Deendayal Upadhyay: Indigenous Socialism, Integral Humanism

Unit I:

Students will learn how the cultural interaction with the West through Colonialism evoked different responses in the Indian intelligentsia. These responses to the Western cultural interactions were not limited only to the intelligentsia but were widespread to different subaltern groups as well. But since this paper concerns itself with modern political thought, the Unit I will begin with historically locating these responses with early nationalists, and emphasis the plurality of the responses through Raja Rammohan Roy, Bankim Chandra Chattopadhyay, and Dayanand Saraswati.

Unit II:

Students will learn how opposition to the Western domination was first manifested as an economic critique of Colonialism. Students will read about Dadabhai Naoroji, MG Ranade, and Gopal Krishna Gokhale, and their seminal contribution to the political underpinnings of colonialism and economic exploitation of the colonies.

Unit III:

Students will learn about the plurality of understanding about the conception and formulation of nation and nationalism. Through the political thoughts of Tagore, Ambedkar, and Gandhi, students will be introduced about the diversity of view on nationalism and how it was imagined as an anti-colonial force despite the reservations of these three thinkers on xenophobia.

Unit: IV:

Students will learn about the two streams of political thought that are usually considered alien, i.e. Communism and Socialism, but with a slant difference. This unit will bridge the gap for

them to understand that how Indian political thinkers made these alien ideologies “Indian” and connected them to the movements of the grassroots.

Basic Principles and Methods in Archaeology

Course Objective:

Basic Principles and Methods of Archaeology is a lecture series that introduces Third semester students to key concepts and practical approaches in archaeology, highlighting their applications in interpreting the human past. The definition, aims and scope of archaeology and its development as a discipline is introduced to the students. The nature of the archaeological record and the unique role of science in archaeology is explained. The course also provides understanding of cultural development and diversity from human origin to civilization development. Legislation related to archaeology and the role of archaeology in heritage management is also discussed in this course.

Course Outcome:

On the successful completion of Introduction to Archaeology students will develop a strong foundation on the basic understanding of the nature, development and value of archaeology as a discipline.

Unit I: Introduction to Archaeology

1. Definition and scope of archaeology
2. Relationship of archaeology with History, Anthropology and Natural sciences
3. History of archaeology in world and Indian context

Unit- II: Field Methods & Techniques of Data Retrieval

1. Principles, Methods, and Techniques of Exploration
2. Principles, Methods, and Techniques of Excavation
3. Stratigraphy: Site formation process and reconstruction of cultural sequences.
4. Archaeological Recording: 3D measurement, Photography, Plan and Section Drawings.

Unit-III: Dating Methods in Archaeology

1. Relative and Absolute Dating Methods
2. Relative Dating: Seriation
3. Absolute Dating: Archaeometric methods such as Carbon dating, Potassium Argon, Thermo-luminescence

Unit- IV: Data Analysis, Report Writing and Publication

1. Archaeological data analysis: Stone Tools, Ceramics, Human Remains, Floral & Faunal remains and Metal Objects.
2. Report Writing and Publication, Preparation of text, Drawing, Archaeological Photography, and Preparation of manuscripts and proof reading.

Unit I:

Archaeology is the study of material remains dug out during scientific excavation. Materiality of material remains has emerged as important area of research in the construction of past. Large chunk of human past is unwritten and even when writing appeared, there were many cultures which did not have written records. Further, there are many writing systems, which were not decipher. This unit seeks to explain that archaeology as a discipline is important in the construction of past. This unit introduces students to this discipline and explains why in American universities Archaeology is part of Anthropology whereas in India Archaeology is offered by Department of Ancient Indian History and Culture. Material remains of the past warrants an understanding of not only human behaviour but also how human beings adapted with the environment. Hence this unit seeks to locate archaeology's intimate relations with geology, fluvial studies, botany and zoology and top of it with Physics and Chemistry,

Unit II;

Unit II seeks to make people understand basic methods of exploration and discovery of archaeological sites through field survey, Google earth and various methods of during exploration. Further the unit deals with methods of excavations, such as laying of trench, baulk methods versus Harris matrix methods of excavation and scientific recording of artefacts and structures encountered during excavations

Unit III:

At the end of this unit, students are expected to know various archaeometric methods of measuring the date of archaeological materials.

Unit IV:

This unit makes students understand and acquire skills on various aspects of post excavation analysis, such as pottery identification, analysis, report writing
